Lucas LALANDE, Ph. D.

Contacts

lalande.luke@gmail.com
+33 6 34 22 24 38

Grenoble, France
31 years old

Qualification sections 66 – 67 - 68

Languages & certifications

- **French:** native / **English:** fluent
- **Animal experimentation** (Designer level)
- **Formation in bioinformatics and genomics**
- **1 Star Diver** (Supervised diver to 20m)
- **Driving licence**

Education

Oct. 2020-Dec. 2023
Ph.D. - Ecophysiology
*Stress, health and senescence in a long-lived mammal, the roe deer (*Capreolus capreolus*)*
LBBE UMR 5558, Lyon, France

Sept. 2018-Sept. 2020
MSc - Behavioural Ecology and Wildlife Management
Dijon, France

Sept. 2017-Sept. 2018
BSc – Biology - Ecology
Chambéry, France

Sept. 2012-Sept. 2015
BSc - Biology
Grenoble, France

- *Sept. 2014-Aug. 2015*
  University of Montreal, Canada

I am an ecophysiology Ph.D. willing to investigate how the physiology mediates the relationships between the environment and ultimate processes.

Research & experience

Publications

- Lalande, L. D. *et al.* **2025.** Adult and juvenile glucocorticoids relate differently to creatinine concentrations in wild roe deer. ***In prep.***
- Perez, G., Lalande L. D. *et al.* **2026.** Possible exposure to unidentified coronaviruses in roe deer (*Capreolus capreolus*) populations suggested by SARS-CoV-2 serological investigation in France. *Royal Society Open Science*, **13**(1); 251477. DOI: 10.1098/rsos.251477
- Lalande, L. D. *et al.* **2024.** Early-life glucocorticoids accelerate lymphocyte count senescence in roe deer. *General and Comparative Endocrinology*, **357**; 114595. DOI: 10.1016/j.ygcen.2024.114595
- Lalande, L. D. *et al.* **2023**. Glucocorticoids negatively relate to body mass on the short-term in a free-ranging ungulate. *Oikos*, **2023**(10); e09769. DOI: 10.1111/oik.09769
- Lalande, L. D. *et al.* **2022**. Sex-specific body mass ageing trajectories in adult Asian elephants. *Journal of Evolutionary Biology*, **35**(5); 752-762. DOI: 10.1111/jeb.14008

Ph. D. Oct. 2020 – Dec. 2023: Stress, Health and Senescence in a long-lived mammal, the Roe deer (*Capreolus capreolus*) – *LBBE UMR5558, Lyon*

Master 2 Internship Feb. 2020 – Aug. 2020
Early-life social environment and body mass senescence in a semi-captive population of Asian elephants (*Elephas maximus*) – *Turku University, Biology Department, Turku, Finland*

Master 1 Internship Mar. 2019 – May 2019
Interpopulation variability in antipredator and mating behaviours in *Gammarus fossarum* in relation to predation risk – *Université de Bourgogne, Biogéosciences UMR 6282, Dijon, France*

Teaching & Science communication

University teaching position, Sept. 2024–Sept. 2025, *Institut National Universitaire Champollion, Albi* **(400.5 h)**
- **Biological sciences – bachelor degree** *(vegetal and animal biology, mathematics and statistics, phylogeny, physiology, ecology)*

Middle school teacher, Mar. 2024–Jul. 2024, *Collège Clément Marot, Lyon*
- **Life sciences**

AXXIS – Bureau des Possibles, *Lyon*
- **Science communication to children (6-8 yo):** scientific method

Ph. D., Sept. 2020–Dec. 2023, *Université Claude Bernard Lyon 1* **(192 h)**
- **Statistics applied to biology**
- **Informatic**
- **Animal biology**

Private tutor, 2017-2020
- Physics and Chemistry, Mathematics

Resources & Packages

Lalande, L. D. **2026.** *conwaysGoL: An easy-to-handle Conway's Game of Life simulator for R* (Version 0.1.1) [R]. 10.5281/zenodo.18290213 (https://github.com/LucasDLalande/conwaysGoL)

Lalande, L. D. **2025**. *selectools : A facilitating model selection procedure* (Version 0.2.1) [R]. 10.5281/zenodo.18289846 (https://github.com/LucasDLalande/selectools)

Hobbies

- Music, Guitar
  - Bed Market
- Climbing, bouldering
- Chess

Conferences

Ph.D. defense, Lyon – Dec. 2023
Stress, health and senescence in a long-lived mammal, the roe deer (Capreolus capreolus)

Michaela Hau, Professor, Max Planck Institute
Reviewer

Jean-François Le Galliard, Research director, Université de la Sorbonne
Reviewer

François-Xavier Dechaume-Moncharmont, Professor, Université de Lyon
Examiner

Emmanuelle Gilot-Fromont, Professor, Université de Lyon/VetAgro Sup
Ph.D. director

Pauline Vuarin, Lecturer, Université de Lyon
Ph.D. co-director

EMPSEB 28, Scotland – Jun. 2023
Oral presentation: Is stress impacting the way you get old?

Ecology & Behaviour, Strasbourg – Mar. 2022
Poster: The grass is always greener on the other side my deer

Decryp'thèse, Lyon – May 2022
Oral presentation: Sex-specific body mass ageing in Asian elephants

BES, Liverpool – Dec. 2021
Poster: The grass is always greener on the other side my deer

Skills

- **Data analyses (R):** Manipulation of large datasets, (Generalized) Linear (Mixed) Models, threshold models, Information criteria for model selection, Path modelling, Leave-One-Out Cross-Validation
- **Bioinformatics:** genomics and transcriptomics, NGS data analyses, QC, alignment, variant calling, visualization, splicing quantification, differential analyses, genome browser
- **Transparent & reproducible research:** version-control, literature management - Git/GitHub, Zotero, Obsidian
- **SQL (MySQL):** Extract and manipulate data from a large database (Myanmar Timber Elephant Project)
- **Programming:** R Package development, Nextflow, Python, Bash
- **Wildlife handling:** Roe deer capture and restraint, morphological and biological sampling (blood, faeces) as part of a CMR program in two wild populations
- **Field work:** CMR, observation, telemetry, *Gammarus fossarum* collection in natural habitat
- **Laboratory work:** breeding and behavioural assay in laboratory-controlled environment, faecal metabolite extraction, haemagglutination-haemolysis assay, ELISA assay, mouse digestive and respiratory system dissection
